

## Egg Donor Program

### Egg donor

- Oocytes donated by women between the ages of 21 **and below 38** at the point of oocyte removal.
- Performed in Singapore
- Nurse shall assess the potential donor's intent, ensure the potential donor meet the age criteria,
- Explain the process of the oocyte donor and fill up a lifestyle questionnaire (Live Donor Assessment Questionnaire).
- Refer potential donor for psychosocial assessment. It must be done together with the spouse if the potential donor is married.
- The Psychiatrist/ Psychologist shall assess the potential donor on suitability to donate.
- When psychological reply has endorsed by **The Clinical Governance Officer**, IVF counselling (which involved the oocyte stimulation and the oocyte retrieval process) is given to potential donor and spouse if married.

### What does it involve?

- Blood investigations for Full Blood Count, Hepatitis B, Hepatitis C, VDRL, HIV, CMV blood IgG, IgM , **HTLV Type I and II, urine Gonorrhoea, Chlamydia** and CMV isolation, blood group and Rh will be taken
- Antral Follicle Count and Day2 FSH/LH/E2 will be arranged.
- Potential donor is given at least 7 days for donor to consider before signing consent
- Nurse shall arrange an appointment with Doctor for donor consent taking, and the doctor shall fill up the donor's details direct into the **IVF database system**.
- The doctor shall perform the physical assessment and clinical examination.
