Clinical Reasoning in Musculoskeletal Physiotherapy

17, 18, 21, 22 October 2024

Introduction

The development of clinical reasoning skills is a pertinent component to guide one towards clinical expertise. This course will cover the principles of clinical reasoning, pain neurophysiology, and adopt a systematic biopsychosocial framework to guide assessment and management of musculoskeletal disorders. The course will include a large component of interactive group discussions.

Course Objectives

At the end of the course, participants should be able to:

- Outline contemporary biopsychosocial approaches for management of musculoskeletal disorders.
- Formulate differential diagnoses of musculoskeletal disorders and evaluate the most likely diagnosis.
- Rationalize and prioritize treatment selections for effective management of musculoskeletal disorders.

Target Audience

Physiotherapists with 2-5 years of working experience in the Musculoskeletal field

Course Outline

- Introduction to Clinical Reasoning Frameworks for Musculoskeletal Physiotherapy
- Understanding Pain
- Pain Pharmacology and Management
- Clinical Reasoning Subjective Interview
- Introduction to the Musculoskeletal Clinical Translation Framework
- Tissue and Fracture Healing

There will be group discussions and case studies covered during the course.
